NOTICE

KNOW

Know nothing
As in...
Never know anything
As soon as you know something...
One begins to think one knows...
Everything worth knowing about
It is when you do not know about something...
The more likely you are to make mistakes.
Through making mistakes we begin to learn.
But do not learn too much.
Because...
When you learn too much...
You will begin to know about things...
And...
You will not be able to make further mistakes.
